GETTING STARTED RIGHT AWAY

With the appointment of Philip James Roberts as Head of Business Transformation & Lean, CASL has wasted no time in starting its journey with 5s implementation and also the creation of CASLs 5s policy.

The 5s Policy is an important document within any company as having a 5s policy shows that we are serious about continuous improvement. Luckily for us in CASL, we have a senior leadership team that is as passionate about continuous improvement as they are about aviation.
